

Noble County Health Department (NCHD)

Sewage Treatment Systems Program:

What Contractors Need to Know

Starting Jan. 1, 2026, Noble County Health Department (NCHD) is teaming up with the Ohio Department of Health to improve sewage treatment systems in our community.

What Does This Mean For Contractors' Registration?

In order to be a registered installer, septage hauler, or service provider in Noble County, you will need to take a completed registration application, the registration fee, and associated materials (such as Bond, Liability Insurance, CEU's, test certificate, and truck inspection if applicable) to NCHD for processing. The application can be found at the NCHD website or can be emailed to you.

Need to Schedule an Inspection?

Please call **614-619-6798** with at least 48-hour notice of a requested inspection. An Environmental Health Specialist at the Ohio Department of Health will team up with NCHD and call you back to confirm and perform your inspection.

Payment Information:

You can pay permit fees by check at NCHD.

Checks should be made payable to **Treasurer of State**. Please include "**Revenue Code NC26**" in the memo section of the check.
